

Comeau Aerospace Inc. - Advanced Projects  
**The Ultimate Flying Machine – Design Engineering Projects**

**CAI-808 Magic Carpet**

- conventional and alternate science, levitation, control and propulsion;
- energy systems research;
- fixed and variable geometry fuselage;
- altitude, weather and load compensating;
- advanced technology materials and manufacturing;
- multi-dimensional physics and multi-phase array research;
- electro-optical and sonic research;
- signature reduction and projection;
- hover, vtol & stol;
- psychotronic research;
- goto and go home autonomous and remote operation;
- auxiliary module retrofit technology;
- search and rescue package, stretcher and life support;
- reconnaissance, intel and re-supply, delivery logistics and pick up;
- electronic signal processing options;
- armoured multi-purpose logistics platform;
- bucket seats, golden tassels variable custom camouflage...
- the art and science of simplifying the complex...with magic...

Based on the original idea and technology of the ancient civilisation of India,  
includes ancient language glyphs and voice activation...this includes Sanscrit...

If you believe in a multiverse, or a parallel universe,  
or creating an alternate space time reality,  
or an alternate reality...  
or a future that you might really like, if you imagined it...

something you can be involved with, make possible and experience personally...  
or if you believe in past lives, live in between lives or future lives...

You can understand how something like this may have existed,  
or that this is presently possible right now...with a certain kind of knowledge base...  
then you have friends in high places!

Naturally and metaphysically, imagine something like this...  
extremely compact, flexible and practical...  
do more than just go along for the ride...  
The personal aerial transportation revolution!
