

Comeau Aerospace Inc. - Advanced Projects  
**The Ultimate Flying machine – Design Engineering Projects**

**CAI-810 Ace : As**

- extreme fluid dynamics research vehicle;
- extreme thrust to weight propulsion;
- extremely low acoustic signature;
- extreme maneuverability, hover and handling;
- conventional and advanced propulsion;
- mechanical and digital flight control systems;
- conventional and advanced materials and production;
- extremely robust and durable for high load, performance and speed;
- armoured, aerobatic, electronic warfare, solar flare and emp proof;
- extremely long range and dense combat operating environments;
- container modules for drop ship and pick up delivery and mission logistics;
- extreme inertial compensation for ship landing;
- extremely robust landing gear for all terrain include mountain topography;
- all weather and extended remote mission tasking equipped;
- multi-purpose boots on the ground unit deployment and mission toolbox;
- strategic and tactical mission special operations;
- multiple moving 3D chess vector scenario with a full deck of cards;
- time travel renaissance from the old school technology vault;

Past lifetimes, present lifetimes and future lifetimes...

they all have something in common...

someone always has an Ace up their sleeve, maybe several,  
maybe all of them and then something more..

If you look for it, you will find it...

If you need it, when there is nothing else that will do,

If you need overwhelming victory, regardless of what you are confronted with,  
regardless of the environment you are in...or the stress you are under...

Relax, fly with something that unifies with your heart and soul...

that moves synchronized with your thoughts,

evading destruction, it is impossible to capture or be out maneuvered.

With something that makes all the difference unknown to anyone else...

Isn't it about time you played that Ace that is in your heart and soul,  
the super power Ace that makes all the difference...your choice is yours alone...

Nobody can make that choice for you...

but you can have some help in time of need,

practical dynamic options that go way beyond conventional reality and operating systems,  
something beyond conventional aircraft that is incomparable,

The Ace, without parallel, nothing equal, competitive or superior in its domain...

**The CAI-810 Ace**
